PROFILE

Full-Stack Software developer with strong expertise in **Angular, C#**, and microservices architecture. Passionate about writing clean, scalable code that improves system efficiency and maintainability. Experienced in **agile** environments, consistently contributing to feature delivery, reducing technical debt, and enhancing performance. Skilled in **unit testing**, cloud platforms (**Azure**), and **API** integrations.

WORK EXPERIENCE

ScanmarQED

Full-Stack software developer

December 2021 - Present

- Demonstrated expertise in modern JavaScript technologies, including **Angular** and **Redux**, through continuous learning and application
- Implemented **Clean architecture** in **C# ASP.NET Core**, improving system scalability and maintainability
- Experienced in integrating **RESTful** services, **Graph API** and **GraphQL** mutations and queries, enhancing application functionality
- Acquired a comprehensive understanding of design patterns such as **Mediator**, **Null Object**, **Model-View-Controller**, and **Singleton**, enabling efficient and optimized software design
- Acquired proficiency in utilizing **Azure** by using Azure Platform Development, Deployment concepts and **SQL** Databases
- Proficient in **Git** for version control and collaboration, as well as **Postman** for efficient API testing and validation
- Proactively wrote extensive **unit tests** for each feature to guarantee stability before deployment
- Valued peer collaboration and actively reviewed colleagues' Pull Requests, while also receiving constructive feedback on personal work
- Actively engaged in daily stand-ups and fortnightly **sprint planning** meetings, contributing to accurate project assessment and progress tracking

Mortgage brain

Intern software developer

May 2019 - September 2019

- Developed and implemented key application features, improving user efficiency and application responsiveness
- Collaborated closely with developers on various tasks, prioritizing stability and quality assurance prior to deployment
- Designed and implemented web pages and intuitive graphical user interfaces, ensuring an enhanced user experience
- Conducted thorough testing on software, proactively identifying and resolving bugs to ensure a smooth application update launch
- Successfully adopted Agile methodology with Scrum, enabling efficient project management and streamlined development processes
- Utilized the **Model-View-Controller** (MVC) pattern to architect robust and maintainable software solutions

EDUCATION

University of Greenwich

Bachelor's Degree in Computing

GPA: First Honours

London, United Kingdom

September 2017 - April 2021

SKILLS

Coding languages:	C# (ASP.NET Core), Typescript, JavaScript (Angular, Redux), Java, Python
DevOps & Tools:	Azure, Git, Postman, GraphQL
Software development:	Microservices, Design Patterns (MVC, Mediator, Clean Architecture), Agile development
Hobbies:	Mixed Martial Arts, Gym, Chess
Languages:	Bulgarian - native, English - fluent
